

# *Supplier of all Building Materials*

**Welcome to CNC Crushers – A North est based construction material manufacturing group.**

CNC Crushers was established in 2006 in Stilfontein. Since then, directors Carl & Cawood Crous as well as Selwyn and Kelvan Schewitz have been committing themselves to CNC Crushers' two primary objectives of

providing superior supply at all times and delivery of these products with outstanding service commitment.

This supply on demand dynamica does not only focus on the manufacturing and supply of products such as sand and aggregated materials to the construction, civil engineering and building industry, but also guarantees a continual, outstanding delivery service to our clients. We have a widely spread footprint and the ability to supply to a number of small medium and large clients. CNC Crushers are proud manufacturers of a number of products such as sand, stone, gravel as well as ready-mix cement. Our annual production boasts delivery in the vicinity of XXX million tons; produced and manufactured at our Stilfontein Manufacturing and production site. In the 7 years of our existence, our clientele extended to

contractors within the governmental and municipal sectors as well as commercial and residential builders and developers.

CNC Crushers have also extended our range of aggregated materials to a high quality precast concrete product range, manufactured and supplied by CNC Crushers sister company Mamello, suitable for application in the building and construction as well as in the mining industries.

# Supplier of all Building Materials

## Products

### **BUILDERS MIX 13 & 19 MM**

Buildersmix is mixed mainly used for foundations.

A user friendly mix of sand and aggregate ideal for mixing with cement for concreting jobs.
